

# Changes to Recycled Water Plumbing Inspections

## Changes post 1 July 2015

After 1 July 2015 the Victoria Building Authority (VBA) will no longer be undertaking Recycled Water Plumbing Inspections throughout the property development. Inspections of recycled water services by the VBA will be in line with the VBA's current inspection regime for other plumbing works.

To ensure safe delivery of recycled water to the community Westernport Water (WPW) will assume responsibility for recycled water plumbing inspections throughout the property development.

## Transitional arrangements post 13 April 2015

From 13 April 2015 the VBA will no longer take bookings for the first two inspections (R1 and R2 inspections). However, the VBA will carry out any R1 and R2 inspections that have already been booked and any follow-up rectification works that require a follow up inspection.

**See reverse for booking details**

## Booking recycled water inspections

- **Post 13 April 2015** – R1 and R2 inspections are to be booked with WPW, R3 inspections are to be booked with the VBA through the VBA's e-toolbox.
- **Post 1 July 2015** – All bookings (R1, R2 and R3) are to be made with Westernport Water.

### How to book recycled water plumbing inspections with Westernport Water

- Call **1300 720 711** and follow the operator prompts to make a booking for a recycled water plumbing inspection.
- Alternatively, you can book your plumbing inspection via email: **[westport@westernportwater.com.au](mailto:westport@westernportwater.com.au)**
- Inspections are carried out between **8:30am – 3:30pm** from **Monday to Friday**.
- Bookings must be made at least **2 business days in advance**.
- If WPW is unable to attend to any booked inspections a WPW plumbing inspector will contact you directly to re-schedule. If you do not hear from WPW, assume that the booking made will be attended at the time scheduled within our inspection hours above.
