# Corporate Plan 2024 - 29

## Acknowledgement

Westernport Water acknowledges Aboriginal and Torres Strait Islander Peoples as First Nations People and that the land, sea and water are of spiritual, cultural and economic importance. We recognise that we provide services on the traditional lands of the Bunurong Peoples of the Kulin Nation. The Bunurong Peoples have managed the resources on Millowl for thousands of years. We acknowledge them and their continued connection to this place, as we go about managing the water resources today.

Reconciliation - Celebrating the official launch of our Innovative Reconciliation Action Plan 2023-25.

# Message from the Chair and MD

Westernport Water remains focused on identifying and embracing opportunities through collaboration, resilience, and a flexible, action-oriented mindset.

We are committed to serving our community, we care about our people, our customers, and the long-term sustainability of the services we provide. We strive to protect and restore the environment, while maintaining service levels and the long-term financial **sustainability of the organisation**. We are proud to present Westernport Water's 2025-29 Corporate Plan. With a focus on collaboration and innovation, this plan outlines our strategy to protect the environment, and deliver services now and for generations to come.

We have been focused on controlling costs while maintaining service levels and being there when our customers need us. We are prudent with our spending and are keeping our debt levels low as we prepare for the future. In the years ahead, we will review our overall procurement practices, commence the Work Smart initiative to bring to life more efficient ways of working, and continue to collaborate with the Gippsland Regional Water Alliance to improve processes and programs.

Water is a precious resource. We know that safe and great tasting water is a priority for our customers and will always remain a priority for us. Over the last 12 months we have invested in an annual program of work that included air scouring to clean 105km of water main, a trial of alternative water main cleaning methods (ice pigging) to remove naturally occurring sediments, the first installation of automatic flushing devices, and the Stanley Road storage tank roof replacement. In the years ahead we will develop a master plan for the lan Bartlett Water Purification Plant, continue the development of the master plan for the water distribution system, and continue engaging with our customers to develop localised insights and actions. Investing in and continuously improving the taste and quality of water remains a priority for us through the implementation of our ongoing Water Quality Continuous Improvement Program (2023-28).

We know that without intervention, the changing climate will have far reaching impacts, and the time to act is now. At Westernport Water we accelerated our emissions reduction ambitions to 2035. In 2022-23 we installed 426 solar panels, launched our new Climate Change Strategy, and developed our Renewable Energy Plan. In the years ahead we will commence the implementation of 430kW of solar system assets and exploration of battery storage, expand the already established Virtual Energy Network pilot exploring the use of the electricity grid for energy sharing, and will develop the Asset Climate Adaptation Framework.

We will begin revegetating 42ha of our land for environmental benefits, and the Electric Vehicle Transition Plan will be finalised. We will further assess the viability for biogas options at our Cowes Wastewater Treatment Plant in line with **Sustainability Victoria's Waste to Energy Fund**, **and continue to work with CSIRO and Deakin University's Blue Carbon** Lab to capture learnings from our floating wetland pilot project, a priority project of the Western Port Integrated Water Management Forum. Learnings from this pilot will inform the future construction of a 60ML recycled water constructed wetland storage project that aims to utilise nature-based solutions to improve the quality of treated wastewater and reduce greenhouse gas emissions, while concurrently creating value adding habitat.

The San Remo to Newhaven Bridge Pipeline and Fittings Renewal Project will continue, we will promote water efficiency targets, roll out our Smart Water Advice Accommodation Kits for guests visiting and staying in the region, as well as continue to support non-residential customers to enhance water efficiency. We value and protect the environment and continue to invest to meet the needs of current and future generations.

We maintain a strong focus on data protection and privacy and will develop a new ICT strategy, and deliver the ICT Improvement Plan focused on embracing the opportunities that new technology offers while rising to the cyber security challenges our evolving environment brings. We will also begin upgrading WPW's Asset Managing Information System.

We understand that our customers continue to experience cost of living pressures. In addition to payment flexibility, Westernport Water remains focussed on facilitating and delivering rebates and grants to our customers. In 2022-23 through our Customer Care Program our customers were able to get access to \$1,061,548 of finance assistance through concession rebates, utility relief grants, high usage leak allowances, and hardship grants. We will continue to take proactive steps to provide targeted relief to customers, residential or commercial, that are finding it difficult to make payments.

In addition, in 2022-23 our sponsorship and grants program delivered benefits across 51 varied and diverse community stakeholder engagements, 34 sponsored events, 24 educational events, and 27 sponsorships and donations. We remain committed to partnering across our community with the continuation of this community grants and sponsorship program, as well as maintaining our relationship with the Phillip Island Community Orchard.

As a long-term supporter of reconciliation on the Bass Coast, we will continue to work with our partners to advocate for a future where our shared history is acknowledged, embrace genuine and respectful relationships as we work to restore land and waterways, and realise the benefits of a diverse and inclusive community and workplace. We remain a committed member of the Bass Coast Reconciliation Network, are committed to entering a service agreement with the Bunurong Land Council Aboriginal Corporation for on-country services, and will maintain corporate sponsorship for the Community Gathering Place Steering Committee. We are also aiming to appoint an independent Aboriginal Delegate to our Board, source and implement additional in-person training facilitated by accredited personnel, and utilise Aboriginal affiliated recruitment agencies to support Aboriginal staff recruitment. We will continue implementing our Innovate Reconciliation Action Plan 2.0 (RAP) which builds on over seven years of focused engagement with Traditional Owners, and Aboriginal and Torres Strait Islander people, including the delivery of our previous two RAPs.

Providing a great place to work that is safe, inclusive, equitable, and rewarding, with flexibility and meaningful benefits and pay, is a priority for us. As part of the 2023 People Matter Survey carried out by the Victoria Public Sector Commission, 99 per cent of our people indicated that Westernport Water provides a safe work environment. This builds on our staff satisfaction of 80 per cent, and an engagement score of 76. In addition, a strong focus on continuing to stand for an equitable and inclusive workplace has resulted in balanced gender representation in leadership and has reduced the gender pay gap to 2.9 per cent at Westernport Water. We will build on these foundations in the year ahead by developing our first consolidated People Strategy, bringing together diversity and inclusion, work health and safety, wellbeing, learning and development, and a proactive attraction and retention strategy, all focussed on enabling our people to thrive.

We value, protect, and strive to restore our natural environment, with a financially sustainable business, sound governance, and prudent investments. We are forward thinking as we plan for our future. We are finding innovative ways to reduce costs while recognising and managing our risks and continuing to provide a great place to work, to ensure our services meet our customers' expectations now, and in the future.

Inad

Chair Annabelle Roxon

Managing Director Dona Tantirimudalige

## About us

The Westernport Region Water Corporation ("Westernport Water" or "Corporation") Corporate Plan 2024-29 has been developed in accordance with the requirements of the *Water Act 1989*.

The Corporate Plan includes the purpose, undertakings and objectives of the Corporation, as well as the 2024-25 financial statements containing the information required by the Minister for Water.

Our purpose

#### Westernport Water will service a healthy community through clever collaboration and protect the environment for future generations because we care.

The Corporate Plan outlines the strategies and initiatives of Westernport Water to achieve its purpose. The plan also includes activities to ensure compliance with the requirements set out in the Statement of Obligations (SoO) and the **Minister for Water's** Letter of Expectation (LoE) that are applicable to all Victorian water corporations.

Students from Our Lady Star of the Sea Primary School received a drink bottle as part of our Prep Water Bottle Program.

## Our role

The core functions of Westernport Water are to provide drinking water, recycled water, and wastewater services to properties and communities throughout its district in accordance with the standards listed in the Westernport Water Customer Charter 2023-28, or by agreement.

Westernport Water is one of 18 water corporations operating and reporting to the State Government of Victoria. Westernport Water is responsible for its own management and performance, servicing over 23,000 customers from 27 townships, across an area covering 300 square kilometers, including Millowl (Phillip Island) and mainland communities from The Gurdies in the north to Archies Creek in the southeast.

The region has one of the highest ratios of visitors to residents of any destination in Australia. During peak periods, there can be approximately 120 visitors to every permanent resident. Permanent residential occupancy rates are higher for waterline communities with 70 per cent to 89 per cent, compared to Phillip Island which can be as low as 44 per cent in Cowes and up to 57 per cent in townships like Rhyll, Cape Woolamai and San Remo.

We source water from Tennent Creek, the Corporation's main water supply source, with additional entitlements to the Bass River, the Melbourne Supply System and groundwater from Corinella Aquifer. Drinking water is produced at Ian Bartlett Water Purification Plant (IBWPP) at Candowie Reservoir in Almurta, then pumped to four enclosed treated water storages for distribution to customers.

We operate two wastewater treatment plants: the Cowes Wastewater Treatment Plant (CWWTP) and the King Road Wastewater Treatment Plant (KRWWTP). Effluent collected from the townships of Kilcunda and Dalyston is treated under an agreement with South Gippsland Water at its Wonthaggi Wastewater Treatment Plant. There are also 99 pump stations across the wastewater network that are used to service approximately 90 per cent of properties that receive drinking water.

Westernport Water offers a range of valuable services to its customers. These include the delivery of Class-A recycled water for various purposes in specific areas of Phillip Island, such as residential, recreational, commercial, and agricultural use. Additionally, the organisation provides services for the removal of commercial trade waste, operates a liquid waste disposal facility, and offers specialist advice on infrastructure and facility design for new developments. These services not only cater to the diverse needs of the community but also underscore Westernport Water's commitment to sustainability and environmental stewardship.

# Corporate Focus Areas and Initiatives of 2024-25

# Water for Victoria and the **Minister's** Letter of Expectations– our delivery

Victoria has a long and proud history of effectively managing its water resources which are critical to our economy, environment, and our communities. Through alignment of our Corporate Plan and Water for Victoria, we will deliver a water system that is modern, efficient, innovative, future focused and affordable. The tables below show the Water for Victoria's Priority Policy Areas and the Minister's LoE's key performance indicators, and Westernport Water's deliverables.

## Climate Change and Energy

Undertake activities and provide services that reduce exposure to climate risks, reduce greenhouse gas emissions, increase renewable energy use, adapt to climate change, and demonstrate reasonable progress in integrating climate change adaptation into planning and decision making across the business.

Key performance areas:

- Emissions Reductions
- Increasing Renewable Energy
- Adapting to Climate Change.

| KPI  | KPI <del>–</del><br>Measure | Definition  | 2024-25<br>Target | 2025-26<br>Target | 2026-27<br>Target | 2027-28<br>Target | 2028-29<br>Target |

|---|---|--|
| Emissions<br>reductions – Total<br>scope 1 and 2<br>(1.1.3.027) | Qualitative explanation of projects or<br>initiatives to reduce Scope 1 and/or 2<br>emissions (including emissions reductions<br>achieved per project in t CO2-e where<br>feasible) | <ul> <li>Continue to implement the Climate Change Strategy's priority areas:</li> <li>Plant efficiencies, targeting an annual reduction of 856 tCO2e.</li> <li>Renewable electricity, targeting an annual reduction of 573 tCO2e.</li> <li>Zero emissions transport, targeting an annual reduction of 26 tCO2e.</li> <li>Reducing emissions from waste and wastewater, targeting an annual reduction of 2045 tCO2e.</li> <li>Carbon sequestration and landscape regeneration, targeting an annual reduction of 500 tCO2e.</li> </ul> |

| KPI   | Definition   | Deliverables 2025-29   |
|---|--|--|
| Increasing<br>renewable energy<br>– Total renewable<br>energy (1.2.2.029) | Qualitative explanation of projects<br>or initiatives to increase renewable<br>electricity consumption and/or<br>generation (including renewable<br>generation capacity increased per project<br>where feasible) | <ul> <li>Deliver emissions reduction through the Power Purchase Agreement with Zero Emissions Water.</li> <li>Continued participation in Virtual Energy Network to use the electricity grid for energy sharing of Westernport Water's exported solar generation with other sites and continue to assess local partnership opportunities.</li> <li>Continue to monitor and report on electricity consumption (MWh) at our sites.</li> <li>Commence implementation of 430kW of solar system assets and exploration of battery storage to support energy resilience.</li> <li>Finalise the Renewable Energy Plan under the Climate Change Strategy, including potential expansion of the Virtual Energy Network.</li> </ul>                                   |
| Adapting to<br>climate change –<br>Adaptation<br>(1.3.1.001)              | Demonstration of reasonable progress in<br>integrating climate change adaptation<br>and risk into planning and decision-<br>making across all aspects of the business  | <ul> <li>Climate Adaptation Risk Workshop and second iteration of the Climate<br/>Change Adaptation Risk Plan and updates to the climate risk register.</li> <li>Development of Asset Climate Adaptation Framework.</li> <li>Implement Year Three of the Urban Water Strategy (2022-27) that<br/>includes review of our drought preparedness plan.</li> <li>Continue to implement initiatives that align with the United Nation's<br/>Sustainable Development Goals.</li> <li>Case study: Exploring climate adaptation through investigating nature-<br/>based solutions for water quality improvement and carbon sequestration<br/>as an innovative approach across areas of wastewater management,<br/>built assets, and natural environment.</li> </ul> |

### Customer, Community and Engagement

Ensure that all aspects of service delivery will be customer and community-centred and will continue to build extensive and effective community engagement and partnerships in planning and implementation of service delivery. Key performance areas:

- Customer Satisfaction
- Bills and Support
- Customer and Community Engagement.

| KPI   | KPI <del>–</del><br>Measure | Definition  | 2024-25<br>Target | 2025-26<br>Target | 2026-27<br>Target | 2027-28<br>Target | 2028-29<br>Target |

By implementing this plan, we seek to foster positive relationships with stakeholders, increase the awareness of our products and services, build water literacy, and enhance the overall customer experience.</li> <li>Progress reports are provided annually to our Board, and through our annual report, which is published on our website.</li> <li>In 2024-25, Westernport Water will also establish its first Annual Customer Assessment Panel to form and communicate its opinion on our annual performance.</li> </ul> |

### **Recognising Aboriginal Values**

Promote self-determination of Traditional Owners, including by supporting the Treaty process as required. Support the implementation of *Water is Life: Traditional Owner Access to Water Roadmap* by enabling increased access to water entitlements under current frameworks and increased cultural benefits from the way we store, deliver, and use water.

Key performance areas:

- Partnerships with Traditional Owners
- Supporting Aboriginal Self-determination.

Director Chris Newton and Managing Director Dona Tantirimudalige present our new Innovate Reconciliation Action Plan

### **Recognise Recreational Values**

Support the wellbeing of communities by considering recreational values in water management. Key performance areas:

- Consideration of recreational values in business operations
- Engagement processes with community or stakeholders
- Improvements to information sources
- Collaboration with stakeholders.

| KPI  | KPI <b>–</b><br>Measure | Definition   | 2024-25<br>Target | 2025-26<br>Target | 2026-27<br>Target | 2027-28<br>Target | 2028-29<br>Target |
|--|-------------------------|--|-------------------|-------------------|-------------------|-------------------|-------------------|
| Consideration<br>of recreational<br>values in<br>business<br>operations –<br>recreational<br>values<br>(4.1.1.001) | Number                  | Provide the number of site-based<br>projects planned/delivered to<br>improve recreational enjoyment of<br>water storages | 1*                | 2*                | -                 | -                 |                   |
| Consideration<br>of recreational<br>values in<br>business<br>operations –<br>recreational<br>values<br>(4.1.1.003) | Number                  | Provide number of water storage<br>recreational areas with Recreational<br>Area Management Plans in place                | 0                 | -                 | -                 | -                 |                   |

\*In relation to recreation, one Westernport Water reservoir has restricted access and as such we have supported alternative projects as described at KPI 4.1.1.001 below.

| KPI  | Definition   | Deliverables 2025-29  |
|--|--|---|
| Consideration of<br>recreational values<br>in business<br>operations –<br>recreational values<br>(4.1.1.002) | Provide a brief description on how site-based<br>projects will improve/have improved<br>recreational enjoyment of water storages.  | <ul> <li>Explore opportunities to deliver improved recreational outcomes like bird watching through projects like the Recycled Water Wetland Storage Project.</li> <li>Maintain relationships and support for the Phillip Island Community Orchard and recycled water demonstration site.</li> <li>Westernport Water only has one reservoir with restricted access, as such we have reimagined how to create recreational opportunities and are supporting community driven garden projects, one particular project being the Phillip Island Community Orchard. Supporting the community to turn a previously unused space into accessible and thriving community space to encourage people to connect with water through growing food, spending time in nature and enjoying local outdoor activities.</li> </ul> |
| Engagement<br>processes with<br>community or<br>stakeholders –<br>Recreational values<br>(4.2.1.001)         | Provide evidence of community engagement<br>processes that identified and considered<br>recreational objectives relating to:<br>- waterway health and environmental land<br>- water planning and management. | <ul> <li>Engagement with stakeholders on opportunities to discharge to and<br/>restore waterways as part of the Recycled Water Wetland Storage<br/>Project.</li> </ul>  |

| KPI   | Definition  | Deliverables 2025-29   |
|---|---|--|
| Improvements to<br>information<br>sources –<br>Recreational values<br>(4.3.1.001) | Provide evidence of actions taken to improve<br>information sources to help recreational users<br>plan their activities.  | - Develop an action plan for the development and maintenance of a comprehensive webpage to provide up-to-date information on current and future recreational opportunities. The webpage will include details on access points, safety information, and any relevant restrictions or regulations. |
| Collaboration with<br>stakeholders –<br>Recreational values<br>(4.4.1.001)        | Provide evidence of actions taken to<br>collaborate with other organisations and<br>government agencies to explore and progress<br>opportunities to support recreational<br>objectives. | - Floating wetland pilot trial at CWWTP to inform the broader<br>Recycled Water Wetland Storage Project at KRWWTP. A trial study<br>is underway with Deakin University Blue Carbon Lab and CSIRO.  |

## Resilient and Liveable Cities and Towns

Contribute to healthy communities by supporting safe, affordable, high-quality services and resilient, liveable environments, and recovery from emergency events that builds back with improved resilience against future risks and manage water resources in a sustainable manner that enhances environmental outcomes and amenity in urban and rural landscapes.

Key performance areas:

- Integrated water management
- Water efficiency and water recycling
- Circular economy outcomes
- Environmental Statutory Obligations
- Sustainable water use.

| KPI   | KPI <del>–</del><br>Measure | Definition                                      | 2024-25<br>Target | 2025-26<br>Target | 2026-27<br>Target | 2027-28<br>Target | 2028-29<br>Target |
|---|-----------------------------|---|-------------------|-------------------|-------------------|-------------------|-------------------|
| Circular<br>economy<br>outcomes –<br>Circular<br>economy<br>(5.3.1.002) | Percentage                  | Provide the percentage of biosolids mass reused | 0*                | 0                 | 0                 | 0                 | 0                 |

\*Targets are currently zero. Awaiting results of contaminant testing which will allow us to calculate application rates and then percentage reuse based on available land.

| Diversity and<br>inclusion –<br>Diversity and<br>inclusion<br>(6.1.1.008) | Summary of progress against<br>LOE Priority Area Leadership,<br>diversity and culture   | <ul> <li>Deliver our third Reconciliation Action Plan 2023-25.</li> <li>Continuing to require completion of online cultural competency training for all staff, whilst sourcing and implementing in-person training facilitated by accredited personnel during the RAP period.</li> <li>Utilise Aboriginal affiliated recruitment agencies to support Aboriginal staff recruitment.</li> <li>Deliver year 3 of Westernport Water's Gender Equality Action Plan (GEAP) 2022-25, including:         <ul> <li>Having consulted with employees to gain additional feedback on internal promotions and secondment opportunities, ensure opportunities are transparent, accessible, and promoted broadly across the workforce.</li> <li>supporting executive officers with learning &amp; development opportunities to provide support &amp; strengthen capability.</li> <li>as part of the Water Industry Equity, Diversity and Inclusion Strategy 2024-28, participate in industry groupings (including Vic Water Managing Directors Forum, Diversity &amp; Inclusion Steering Group (DISC) and Practitioners Network) to identify and dismantle gender barriers (including intersectional factors), for operational, treatment &amp; customer service roles, and apply findings at Westernport Water.</li> </ul> </li> <li>Promote 2025 staff survey to ensure high participation, including information on why survey is being run, actions from previous results and assurance on confidentiality of responses.</li> </ul> |

## Performance and Financial Management

Improve efficiency and consistency in the reporting of performance while delivering safe and cost-effective water and wastewater services in a financially sustainable manner.

Key performance areas:

- Audited statement of performance
- Additional financial performance.

| KPI   | Definition  | Deliverables   |
|---|---|--|
| Additional<br>financial<br>performance –<br>financial<br>performance<br>7.4.2.001 | Financial business targets and projections,<br>including projections for dividend and tax<br>equivalent payments (for 2024-25 to 2028-29)   | - Included in the Financial Statements, refer Appendix A.  |
| Additional<br>financial<br>performance –<br>financial<br>performance<br>7.4.2.002 | Quarterly financial projections for the first year of the planning period (for 2024-25 only)  | - Included in the Financial Statements, refer Appendix A.  |
| Additional<br>financial<br>performance –<br>financial<br>performance<br>7.4.2.003 | Debt management strategies in line with DTF<br>management guidelines and requirements (for<br>2024-25 to 2028-29)   | - Continue to take a conservative approach post COVID-19 due to the increasing inflation pressures on our customers.   |
| Additional<br>financial<br>performance –<br>financial<br>performance<br>7.4.2.004 | Any unregulated business activity/ies<br>including forecasts of revenue and<br>expenditure and the benefits realised/reasons<br>for undertaking the activity/ies (for 2024-25<br>to 2028-29)                        | - Unregulated income is conducted through the sale of disposal of assets including cattle and hay via utilisation of the corporations land through the Farm Management Plan and the sale of expired fleet vehicles as part of the fleet replacement program. Refer to the Financial Statements Appendix A.   |
| Additional<br>financial<br>performance –<br>financial<br>performance<br>7.4.2.005 | Operational risk assessment, encompassing<br>analysis of factors likely to affect achievement<br>of efficiency targets, and/or create significant<br>financial risk for the corporation (for 2024-25<br>to 2028-29) | <ul> <li>Included in the Financial Sensitivity Analysis tables, refer pages 39-<br/>41.</li> <li>A Corporate Plan Initiative for 2024-25 is to commence the<br/>WorkSmart initiative to identify and progress efficiency measures.<br/>This initiative seeks to drive customer value through understanding<br/>and achieving efficiency targets whilst mitigating financial risk.</li> </ul> |
| Additional<br>financial<br>performance –<br>financial<br>performance<br>7.4.2.006 | Impact on financial performance of high and<br>low scenarios for key planning variables (such<br>as supply availability, water consumption,<br>interest rates) (for 2024-25 to 2028-29)                             | <ul> <li>Included in the Financial Sensitivity Analysis tables, refer pages 39-<br/>41.</li> </ul>   |
| Additional<br>financial<br>performance –<br>financial<br>performance<br>7.4.2.007 | The entity's credit rating received from<br>Treasury Corporation Victoria (TCV) for<br>Financial Accommodation Levy or an<br>independent credit rating (for 2024-25 only)   | <ul> <li>Included in the Corporate Plan Performance Measures and Targets<br/>2024-25, refer page 23.</li> </ul>  |

# Customer Protection, including the Prevention of Harm from Family Violence

Westernport Water takes our responsibility as custodians of customer data very seriously. We are dedicated to continuous improvement in cybersecurity, in alignment with the Victorian Protective Data Security Framework (VPDSF). To achieve this goal, we are conducting a comprehensive gap assessment against the VPDSF. This review will provide Westernport Water with a thorough understanding of our current maturity level and will enable us to develop a prioritised action plan to advance our cybersecurity capabilities.

At Westernport Water, we routinely engage in various ICT activities to ensure our readiness to recover from cybersecurity or data loss incidents. These activities encompass regular backups, robust identity management practices, timely installation of security updates, and application hardening, among others. In the event of a data breach, Westernport Water has a clearly defined procedure outlining our response. This includes initiating an incident response, promptly notifying relevant agencies, and seeking expert assistance for recovery, if necessary, based on the severity of the breach. Furthermore, we have several cybersecurity enhancement projects scheduled for completion in the 2024-25 financial year which underscore our commitment to improving our cybersecurity posture and safeguarding the data entrusted to us by our customers and stakeholders.

Westernport Water remains committed to information security to protect customer information from loss or exploitation. This includes regular privacy and cybersecurity refresher training for all staff and regular audits of our data privacy protections. We maintain a Privacy Charter that explains to customers what personal information we collect and how we disclose this information. We also have procedures in place to manage any privacy-related complaints or data breach. There were no notifiable data breaches recorded last year.

In 2022-23 our customers were able to access \$1,061,548 of finance assistance through concession rebates, utility relief grants, high usage leak allowances, and hardship grants. We continue to have strong targets in place to provide targeted relief to customers and prioritise support measures over debt recovery activity, such as legal action or supply restrictions.

Over the last 12 months, Westernport Water collaborated with the Essential Services Commission to review its Family Violence Policy and supporting procedures in line with the Water Industry Standard - Urban Customer Service. The review led to improvements to the policy with a visual guide now available for customers that maps out what to expect when seeking support from Westernport Water.

## Cyber Security

Westernport Water takes a strategic approach to cybersecurity risk reduction by combining the best practices of the National Institute of Standards and Technology (NIST) Cybersecurity Framework with the Essential Eight (E8) guidelines from the Australian Cyber Security Centre. This dual framework strategy allows us to stay on top of industry standards and cover all essential cybersecurity areas.

The NIST Cybersecurity Framework gives us a structured way to manage and reduce risks, focusing on key functions like identifying threats, protecting our systems, detecting breaches, and responding effectively. Alongside this the E8 provides targeted strategies for critical security controls, enhancing our ability to defend against common cyber threats.

By integrating these frameworks into our cybersecurity practices, Westernport Water strengthens its resilience against evolving risks while keeping in line with global and national standards. This approach underscores our commitment to ensuring ongoing the security and integrity of the data and systems entrusted to us by our community and stakeholders.

## Housing Statement

Victoria's Housing Statement recognises the role that Water Corporations must play in getting Victorians into their new homes faster through speeding up connections as our towns and cities grow.

As the referral authority for planning applications in the Bass Coast Shire Council (BCSC) area, Westernport Water closely collaborates with BCSC to review and provide water, wastewater, and recycled water services (if applicable) for development and subdivisions within our service catchment. Our development referral application review process and timelines comply with the current Planning Act and Subdivision Act. Additionally, Westernport Water is actively engaged with developer consultants in engineering designs for these developments.

# Corporate Plan Performance Measures and Targets 2024-25

|   | Corporate Plan Performance Measure   | Target   |
|---|--|--|
| 1 | Delivery of the Corporate Plan Initiatives<br><i>To achieve safe and reliable water and wastewater services to support</i><br><i>sustainable and liveable communities.</i>   | Successful completion of the 14 Corporate Plan<br>Initiatives in line with the program for delivery. |
| 2 | Maintain the Corporation's AA rating<br>To ensure Westernport Water continues to demonstrate sound financial<br>performance.   | Maintain the Corporation's AA credit rating.   |
| 3 | Customer Survey – Satisfaction result<br>To understand customer perceptions and overall satisfaction of our<br>customers with Westernport Water as a service provider.   | 7 out of 10 rating for overall customer satisfaction.  |
| 4 | Compliance – Enforcement action<br>To measure compliance with legislation by ensuring no enforcement action<br>such as a penalty infringement or abatement notice, direction or an<br>enforceable undertaking.   | 0 regulator actions.   |
| 5 | Employee Satisfaction - People Matter Survey<br><i>To measure the level of engagement of employees to provide an indication</i><br>of their commitment to the organisation's goals and values and their<br>motivation to contribute to the organisation's success. | >78 Employee Engagement Index  |
| 6 | Water quality compliance with Safe Drinking Water Regulations<br>To ensure the provision and supply of safe drinking water in accordance<br>with the regulations.  | 100% compliance.   |
| 7 | Environmental Impact - Compliance with EPA Licence<br><b>To measure compliance at Westernport Water's two</b> licensed wastewater<br>treatment plant sites.  | 100% compliance.   |
| 8 | Customer Service Level - Guaranteed Service Level payment<br>To measure the level of service to customers the ESC sets out provision for<br>payments to customers for failure to meet Guaranteed Service Level.  | <b>≤ 3 payments in the</b> 2024-25 year.   |
| 9 | Delivery of our Customer Commitments - Price Submission 2023-28<br>To ensure we are delivering on the customer commitments set out in our<br>Price Submission 2023-28.   | Annual performance consistent with PS23 customer commitments.  |

Performance measure results from previous years are reported annually via both the Westernport Water Annual Report and the Westernport Water Annual Watermark.

## Corporate Plan Initiatives

Each year as part of our annual planning process, we identify a set of Corporate Plan Initiatives that will enable us to deliver on our strategic focus areas and corporate objectives. The following section outlines our Corporate Plan Initiatives for the 2024-25 financial year.

## We deliver value to our customers

Westernport Water is committed to providing products and services that meet customer expectations. We will achieve this by understanding and learning from our customers, valuing our customers through a positive customer-first culture, striving to continually improve the quality of our water and wastewater services, and providing accessible, transparent, and consistent information. We will continue to offer and promote flexible payment options for customers experiencing hardship, whilst actively seeking opportunities to deliver increased value.

# 1. Deliver Year Two of the Water Quality Continuous Improvement Program (2023-28)

The Water Quality Continuous Improvement Plan focuses on operational improvements in water quality. In the upcoming year, the program will concentrate on the following areas to improve water quality:

- Develop a master plan for the Ian Bartlett Water Purification Plant
- Continue with the development of the master plan for the water distribution system, including
  potential augmentations for growth, maintaining service levels, optimal source utilisation, system
  resilience measures, and reviewing disinfection strategies
- Continue engaging our with customers to develop localised insights that identify drivers of customer satisfaction with water quality
- Prepare for legislative changes Safe Drinking Water Regulations (sunset 2025).

These efforts will ensure that Westernport Water continues to deliver the highest water quality to our customers.

This Corporate Initiative aims to address our Governance and Product Quality strategic risks.

## 2. Review procurement practices to deliver social, environmental and economic benefit

Westernport Water will undertake a review of its procurement practices to ensure they align with the Victorian Government's purchasing principles.

Consistent with guiding principles, our practices will be reviewed to ensure value for money, accountability, integrity, fairness and transparency.

Furthermore, the review will focus on scalability to ensure that our processes are appropriate and efficient - recognising the risk and complexity of each procurement.

This Corporate Initiative aims to address our Governance and Financial strategic risks.

## Our people are safe and better for working here

First and foremost, our staff need to be safe when working for us. This includes physical and psychological safety, and **applies everywhere our people work: whether that's at a treatment plant, on the road,** walking around a pumping station or a neighbourhood reading meters, as well as in a corporate setting and working from home.

We also want our staff to benefit from working with us or, put another way, that all our people are better for working at Westernport Water. **That's** about fair remuneration **but it's more** than pay alone. It includes learning and development, career progression, non-salary benefits, being part of a diverse and inclusive workforce, being connected to the community we serve, and having fun and feeling engaged and satisfied in the work we do.

#### 3. Develop and commence implementation of **Westernport Water's People** Strategy

This initiative aims to develop an overarching People Strategy which covers all aspects of people, culture and safety activities at Westernport Water. It will cover three years and align our corporate initiatives and priorities with people, culture and safety actions and commitments, ensuring we have the capabilities and skills needed for our future workforce. It will include work, health and safety and diversity and inclusion strategies, which have been longstanding focus areas at Westernport Water, continuing to support achievement of a strong culture and meet compliance requirements.

It also seeks to respond to recruitment and retention needs, learning and development outcomes and leadership capability development, in a broader environment full of disruptors, from climate change, AI (Artificial Intelligence), personalisation of the workplace and cost of living; all issues for our people and Westernport Water to navigate. These actions occur in the context of the water industry as an essential service, and delivery of value to our customers.

This Corporate Initiative aims to address our Business Continuity and Work, Health & Safety strategic risks.

#### 4. Commence Talent Attraction and Retention Plan

As a smaller organisation, it's critical to have people with the right skills and experience in key positions when vacancies arise, or new roles are required. In our post-pandemic context, a tight employment market for specific skills coupled with finding people already in our region or attracting them here provides additional challenges. The development of a proactive strategy responds to these issues, and will address:

- strategic workforce planning;
- remuneration review and policy;
- simplification of position descriptions for recruitment advertising;
- review of recruitment advertising channels and approach;
- succession planning; and
- identification and smoothing of friction points in people processes, improving employee experience.

#### 5. Commence WorkSmart Initiative to Identify and Progress Efficiency Measures

Westernport Water is actively seeking out new ways to work that will drive customer value and create benefits for the workplace. The WorkSmart Committee has been established to bring a cross-business focus to emerging cost pressures in order to find alternative approaches that offer efficiencies. In turn, this will allow the business to continue to fund and deliver its commitments to customers.

This Corporate Initiative aims to address our Governance and Financial strategic risks.

The installation of solar systems at key sites have increased renewable energy generation and contributed to efficiencies.

# We invest in our assets to meet the needs of future generations

We aim to create a vibrant and engaged culture of asset management, enabling reliable service delivery in a warmer and drier climate, whilst continuing to provide reliable, safe drinking water and sustainable wastewater treatment and disposal services.

#### 6. Renew San Remo to Newhaven Bridge Pipeline and Fittings

The San Remo to Newhaven Bridge Pipeline and Fittings Project is essential to ensure reliable and high-quality services to San Remo and Phillip Island. Westernport Water has three pipelines connected to the underside of the San Remo Bridge; two of these supply drinking water from the San Remo Basin to Phillip Island and the third pipe transports wastewater from San Remo to the Cowes Wastewater Treatment Plant. The pipeline assets vary in age from thirty to fifty years, and the project includes a combination of replacing and refurbishing the brackets that attach the pipelines to the bridge and wrapping of the mild steel water pipe.

A key project consideration is the method of access to the pipes, with Westernport Water consulting closely with key stakeholders such as the Department of Transport and Planning, and Parks Victoria. Impacts on road users and water users will be kept to a minimum and water and wastewater services will continue as normal during the works period.

The works are expected to extend the asset life of the pipelines and fittings by thirty years and contribute to the ongoing supply of reliable water and wastewater services to our customers. This year will see the completion of this complex project, after numerous years of planning and approvals.

This Corporate Initiative aims to address our Asset Management and Product Quality strategic risks.

#### 7. Develop new ICT Strategy (2025-28)

This year Westernport water will engage with an external partner to develop an ICT strategy for the years 2025-28. This will involve assessing current state technology, identifying future needs, and setting clear objectives in alignment with business outcomes and addressing our key strategic risks. The strategy will focus on operational efficiency, asset management, data security, information management, employee skills and partnering opportunities with other water corporations in our region with a key outcome being the improvement of the customer experience and the development of an ICT roadmap for the period.

The roadmap will describe the initiatives and investments needed to achieve the stated objectives while considering budget constraints and resource availability. The strategy will be continuously evaluated over the period to ensure Westernport Water can adapt to evolving technological trends and regulatory requirements, with the goal being the secure provision of technology, skills and services to support customer delivery.

This Corporate Initiative aims to address our Technology strategic risk.

## 8. Deliver ICT Improvement Plan, including Data Security and Privacy Improvements (2024-25)

The ICT Improvement Plan for 2024-25 will prioritise lifecycle management and focus on improving our ability to detect and respond to cyber threats, optimise network performance, and improve operational resilience to align with our organisational objectives more effectively.

Our main uplift project is a comprehensive lifecycle upgrade of firewalls at key sites plus internet service upgrades where available. The key benefits of this project are:

- Enhanced audit logging capabilities enabling the shared Victorian Government Security Operations Centre to improve the monitoring of the Westernport Water ICT systems and enable earlier detection of irregular cyber activities.
- Improved data traffic management capabilities to enable separation of the core treatment plant operations from the corporate business systems.
- Gives Westernport Water a pathway to change internet service providers more easily in the future.

In addition to these critical works, we will be upgrading the operating system of our staff laptops to maintain a secure and supported technology platform. We will also be introducing improved mobility features to our ICT business systems and infrastructure which will allow our staff to work more efficiently in the field.

This Corporate Initiative aims to address our Business Continuity, Technology and Cyber strategic risks.

#### 9. Upgrade Westernport Water's Asset Management Information System

Westernport Water has identified opportunities for improvement within the Asset Management Information System. These opportunities primarily focus on enhancing the capabilities of Asset Management and Works Management software, enabling Westernport Water to maximise the value of our assets and optimising whole of lifecycle asset management. We are currently assessing the process and configuration requirements to meet the organisations current and future needs.

This Corporate Initiative aims to address our Technology and Asset Management strategic risks.

#### 10. Develop Compliance and Enforcement Framework

The Compliance and Enforcement Framework will provide the foundations required to ensure we have a robust system in place to manage non-compliant connections to our network, and water theft.

Water is a precious and limited resource, it is critical to our economy, environment and communities. We need to ensure we are managing water fairly for all water users whilst maintaining the health of our environment and network reliability for our community.

The framework will take a holistic approach, analysing Westernport Water's current profile of non-compliant connections, water theft history, challenges and associated risks. We will consider areas such as backflow prevention, trade waste and illegal connections. We will ensure appropriate measures are in place to enforce our powers under the *Water Act* 1989 to meet our obligations to our customers.

This Corporate Initiative aims to address our Governance and Asset Management strategic risks.

## We partner with our community

Westernport Water will engage openly and transparently with our community by building strong partnerships and working collaboratively to meet our corporate objectives. We will seek to represent and reflect our community's priorities. In addition, we will deliver shared benefits through water management opportunities, regular education activities, strategic partnerships, and community support that will create social, recreational, and environmental benefits for a more liveable and resilient community.

At Westernport Water, we believe that community and stakeholder engagement is successful when customers and communities:

- understand what it is we do, and the impacts and cost of delivering essential services;
- affected by a project or decision are actively involved and engaged;
- can share their thoughts, opinions, and have confidence that their concerns are acknowledged and addressed;
- have the opportunity to influence outcomes by being informed and engaged in the development of our products and services;
- may better understand our priorities and challenges, why they are being engaged, and their level of influence in the engagement process; and
- can provide input that will shape the preferred solution and deliver customer driven outcomes.

#### 11. Deliver Innovate Reconciliation Action Plan 2.0 (2023-25)

Our Innovate Reconciliation Action Plan 2.0 (RAP) October 2023 to October 2025 builds on over seven years of focused engagement with Traditional Owners, and Aboriginal and Torres Strait Islander people, including the delivery of our previous two RAPs.

Talking, walking, and working together, we will build trust and respectful relationships with Traditional Owners and Aboriginal and Torres Strait Islander peoples to enable us to achieve positive social change, and support self-determination to increase their access to water and involvement in water management.

Westernport Water's commitment to reconciliation is reflected in everything we do and is highlighted in our Innovate RAP 2023-25. Through the Innovate RAP we will advance reconciliation within our sphere of influence and focus on strengthening relationships with Aboriginal and Torres Strait Islander peoples. Internally, we will drive reconciliation through business activities, services, and programs, embedding processes and systems at all levels of the business.

Westernport Water is committed to reconciliation with Australia's First Nations people and is committed to building respectful and collaborative relationships with the Traditional Owners of the land, the Bunurong people, and other Aboriginal and Torres Strait Islander people living in the region.

This Corporate Initiative aims to address our Governance strategic risk.

# 12. Collaborate with Gippsland Regional Water Alliance to Improve Effectiveness of Process and Programs

Westernport Water will continue to drive a strong focus on performance, business improvements and efficiencies through an ongoing partnership with South Gippsland Water, East Gippsland Water, Gippsland Water and Southern Rural Water. The partnership represents a unique alliance of regional water businesses that delivers improvement opportunities through collaboration that ultimately benefit staff, customers and the Gippsland community.

This Corporate Initiative aims to address our Business Continuity and Financial strategic risks.

Community Support Program supports Phillip Island CFA – pictured, Katrina Knight Westernport Water, Anita Reed CFA, Jordan Crugnale MP, Member for Bass. Our Community Support Program provides funding for community-led initiatives that help build strong, healthy and sustainable communities. Resilient and Liveable Cities and Towns

## We value and protect our natural environment

Westernport Water understands that our operations have the potential to impact the environment and we are committed to protecting and enhancing the environment within our service area. We do this by:

- investing in best practice technology;
- monitoring our treatment facilities and the environment;
- utilising an Environmental Management System to manage environmental risks;
- working with local environment groups on issues of regional significance;
- considering recreational values and integrated water management; and
- providing strategies to support climate change adaptation and mitigation, and emissions reduction.

#### 13. Deliver Year Two of the Climate Change Strategy (2023-28)

Our current Climate Change Strategy was developed in 2022-23 and sets out our actions to meet the requirements of the Victorian Government under the *Climate Change Act 2017*, and specifically, our emission reduction commitments outlined in the *Statement of Obligations – Emissions Reduction 2022*.

In 2021, the Victorian Government released its Whole of Government Emissions Reduction Pledge outlining its commitment for 100% of electricity needs to be met with renewable energy sources. Our Climate Change Strategy maps out our pathway to reaching 100% use of renewable energy sources at our sites and how we will reach our emission reduction pledge commitment of 606t CO2-e, by 2030, and net zero emissions by 2035.

Year Two of the Climate Change Strategy will see implementation of our Renewable Energy Plan including continuation of the Virtual Energy Network and progress toward implementation of 430kW of solar generation assets in parallel with energy efficiency projects to reduce electricity use at our treatment plants. The Electric Vehicle Transition Plan will be finalised mapping our fleet transition pathway. We will instigate the revegetation of 42ha of our land for carbon offsets and environmental benefits.

This Corporate Initiative aims to address our Environmental, Climate Change and Governance strategic risks.

# 14. Continue with Floating Wetland Pilot Project at CWWTP – Part of Year Two of the Integrated Water Management (IWM) Priorities

The floating wetland pilot trial was part-funded by DEECA, as a key priority project in the Western Port IWM Forum Area. The floating wetland was installed on the effluent lagoon at the CWWTP in April 2023 to establish a trial to assess the performance of the nature-based system at improving water quality and reducing greenhouse gas emissions. The second year of the pilot project sees the ongoing monitoring and analysis as trends in data are established.

The Project Working Group meets regularly with updates provided to the Project Reference Group at key stages. Water quality improvements will directly benefit our recycled water customers and receiving environments. The pilot project is run in partnership with Deakin University Blue Carbon Lab and CSIRO and findings will also be used to inform our strategic approach to the use of recycled water in wetland systems, particularly our plans for a wetland storage system at KRWWTP.

This Corporate Initiative aims to address our Environmental, Climate Change, and Governance strategic risks.

# Key Drivers of Corporate Plan 2024-29

#### Price Submission 23 (2023-28)

The 2023-28 Corporate Plan projects and budgets have been developed to align with the parameters set within the Price Submission 23 (PS23) for 2023-28, which was approved by the ESC on 20 December 2022. Pricing and tariffs for 2024-25 are increasing by CPI as per year 2 PS23 assumptions. Annual tariffs reflect the approved adjustments for Melbourne Water Bulk Charges and cost of debt adjustments as detailed in Schedule 5 of PS23 for 2023-28.

Net Profit After Tax (NPAT) will remain profitable in line with budget expectations for the PS23 period, with an allowance for minor variations including the introduction of an efficiency dividend as announced by the Victorian State Government in Budget Paper 4 released in May 2023. As this payment will be in the form of Capital Repatriation it will not directly impact operating expenses. Variations to PS23 are detailed in Appendix D.

#### Debt Management

Debt management remains a key focus in maintaining the financial stability of the Corporation. The 2024-25 Corporate Plan continues to actively manage debt levels and balance debt against capital program requirements.

Due to the current challenging economic environment, the PS23 capital program has been slightly reprofiled against the original budget with a small number of planned capital program scopes being brought forward due to contractor and material shortages however, will remain on budget for the PS23 regulatory period.

The Corporation is committed to maintaining its AA credit rating by prudently managing operating expenditure and debt levels. Overall the five-year outlook is in line with PS23 assumptions to minimise price increases to customers, in lieu of repaying debt. The following table shows the level of fixed debt for the Corporation over the five-year Corporate Plan period (excluding temporary borrowing facilities).

Short term borrowings and investment will be utilised to smooth cash flow, with longer term borrowings directed towards the financing of the capital program.

Debt levels will be reprofiled against PS23 assumptions to reflect the rephasing of the capital program with a contingency allowance to support short term cashflow for any changes to major capital works. Fixed loans of \$1.25M will be repaid and redrawn to assist funding requirements for 2024-25. Although there is a commitment to find efficiencies to fund the new Victorian State Government efficiency dividend, as this was not known at the time of PS23 submission, it is assumed that short term borrowings may be required to support cashflow to fund these capital repatriation payments which is reflected in the table below.

| Fixed Debt                         | 2023-24  | 2024-25 | 2025-26 | 2026-27 | 2027-28 | 2028-29 |
|------------------------------------|----------|---------|---------|---------|---------|---------|
| \$'000                             | Forecast | Budget  | Budget  | Budget  | Budget  | Budget  |
| Total Fixed Debt Budget (per PS23) | 14,640   | 15,640  | 16,240  | 18,240  | 13,140  | N/A     |
| Total Fixed Debt Budget            | 11,140   | 19,590  | 21,340  | 21,650  | 16,900  | 14,900  |

#### Financial Analysis, Considerations and Projections

The financial analysis tables and projections are provided in Appendix A.

The financial targets and ratio analysis are set out in Appendix B. These ratios are consistent across the five-year outlook. In previous years and in the PS23 submission, no provision was made for dividend payments however, with the introduction of the new Victorian State Government efficiency dividend from June 2024 announced in May 2023, the financial statements have been adjusted to reflect this change which will be in the form of a cash capital repatriation payment.

# Planning Assumptions

#### Water Allocations

An Urban Water Strategy (UWS) was completed in March 2022 to plan for the supply of water and future growth in population and connections to the water supply system. The growth is based on the Victorian **Government's Victoria** In Future (VIF) projections for the Westernport Water region and annual increase in recent years. The demand forecast provides an upper and lower band limit from the expected or baseline demand. The baseline demand was developed based on a 2 per cent per annum increase in residential demand and a 1 per cent increase in non-residential demand. The graph below shows the demands until the year 2070. An updated Urban Water Strategy will be delivered in March 2027, which will review the previous demand forecasting for the next 50 years.

Westernport Water accesses water from a diverse range of sources. Bulk entitlements are held for 2,911 ML from Tennent Creek in Candowie Reservoir, 1,000 ML from the Melbourne Headworks system via the desalination transfer pipeline water supply system and 3,000 ML from the Bass River.

Climate change is predicted to affect the yield from our water sources but to what extent is uncertain. The yields have been assessed according to DEECA guidelines for assessing the impact of climate change on water supplies in Victoria and reflect the scenarios recommended in the guidelines.

The UWS indicates that the water supply system will be robust for the next ten years supplying all the forecast demands. The Westernport Water Climate Change Adaptation Plan identifies actions to meet future climate change scenarios and their impact on water supplies. Ongoing management of water supplies will be reviewed annually as part of the Annual Water Outlook, and in response to the UWS actions, to ensure Westernport Water meets customer demands now and into the future. Westernport Water communicates the short-term water resource position via the Annual Water Outlook published prior to summer each year.

# Recycled Water Assumptions 2024-25

Westernport Water's Recycled Water Strategy provides an over-arching guide to support the continued uptake of recycled water to ultimately reduce volumes of treated wastewater discharged to the ocean from CWWTP. In 2022-23, Westernport Water developed a new Recycled Water Strategy which includes inputs from customer engagement and our environmental obligations.

CWWTP treats sewage from the major towns on Phillip Island (excluding Silverleaves) and San Remo. This treatment **plant receives 85 per cent of inflow from Westernport Water's sewer** network. Based on the past five-year average, around 3.9 per cent of inflow from CWWTP is treated to a Class A or B recycled water quality and distributed to residents in new housing estates in Cowes and Ventnor, and to non-residential users such as the Phillip Island Golf Club and recreation reserves. A further 2.7 per cent is used onsite to water tree plantations and the remaining 93.4 per cent of treated effluent is discharged to Bass Strait at Pyramid Rock.

KRWWTP treats sewage from Grantville, Coronet Bay, Corinella, Tenby Point and Pioneer Bay, receiving around 15 **per cent of Westernport Water's sewage inflow. All KRWWTP's treated wastewater is irrigated on Westernport Water** owned farmland surrounding the treatment plant, except 90<sup>th</sup> percentile rainfall years when discharge to Guys Creek is permitted by the EPA.

The key projects for 2024-25 from our Recycled Water Strategy include:

- upgrade of our recycled water infrastructure to meet demands at CWWTP;
- expansion of irrigation to newly purchased land at CWWTP; and
- reducing inflow and infiltration of stormwater into our sewer network (ongoing).

The key to increasing reuse is to maximise opportunities for sustainable reuse on Westernport Water land. Westernport Water is investigating how different crop types and irrigation systems can maximise recycled water use. Westernport Water will continue to encourage recycled water use by commercial and residential customers, especially customers with a demand that is not dependent on weather conditions.

Note:

\*The Tariff Schedule for 2024-25 above has been calculated using a CPI increase of 3.6 per cent as **confirmed by WPW's economic regulator, the** Essential Services Commission on 26 April 2024 through the annual tariff approval process. However, tariffs will require further adjustments for Melbourne Water Bulk Charges and cost of debt as per Schedule 5 of PS23 which is expected to be confirmed in May 2024.

# Operating Environment Assumptions 2024-29

As Westernport Water enters the second year of the PS23 regulatory period, it remains committed to ensuring that products and services remain affordable and will continue to focus on supporting our most vulnerable customers experiencing financial hardship through flexible payment options and targeted hardship grants. By aligning internal skills and capabilities to our key focus areas, Westernport Water will deliver the operational efficiencies required to reduce operational expenditure in the next five year regulatory period, as committed to in PS23.

The 2024-29 Corporate Plan has factored in the immediate known economic conditions which is consistent with PS23 methodology however, unknown non-controllable operational impacts often require the business to demonstrate agility and at times re-think its approach for the longer term sustainability.

Development activity is expected to continue to perform consistent with PS23 assumptions and prior year trends. The capital program is being driven by operational needs in alignment with PS23 requirements and limits across the full ten-year PS23 forecast. Key projects are outlined in the Capital Expenditure tables in Appendix C.

Phillip Island Football Club players choosing tap water to stay hydrated.

#### OFFICIAL

# Finance Assumptions 2024-25

The financial assumptions set out below form the basis for the budgeted net profit after tax result of \$1.9M and a positive net cash flow from operating activities.

#### **Revenue Assumptions**

Service Charges:

- The Tariff Schedule for 2024-25 has been calculated using a CPI increase of 3.6 per cent as confirmed by the Essential Services Commission on 26 April 2024 via the annual tariff approval process, however will require further adjustments for Melbourne Water Bulk Charges and cost of debt adjustments as per Schedule 5 of PS23 which is expected in May 2024.
- Residential customer growth of 2.24 per cent.
- Non-residential connection growth of 1.17 per cent.

#### Water Usage:

- Domestic water consumption, 88kL per connection.
- Non-Domestic water consumption, 651kL per connection.

#### Developer Income:

- Creation of approximately 399 new allotments based on PS23 growth predictions and historical trends.
- New Customer Contribution model from the PS23 which ensures that the cost of new development in the area is better aligned to the developer and not the existing customer base.

#### **OPEX** Assumptions

- Increases in wage and salaries will remain in line with PS23, consistent with the current Enterprise Agreement and overall government policy for annual wage rises (2 per cent increase in base rates and allowances and 0.5% increase in superannuation effective 1 July 2024).
- Employee costs include a 3 per cent vacancy rate in line with PS23 assumptions.
- Overall operational expenditure has been profiled against the approved PS23 budget offset by the efficiency rate of 1.5% as committed to our customers during the pricing submission engagement.
- A one-off cost associated to climate change (\$130k) has contributed to the increase in administration expenses above PS23 expectations. Dam safety compliance works of \$195k which is expected to be recurring annually for the remainder of the regulatory period has also contributed to this increase.
- Preventative maintenance costs will increase largely attributed to above CPI contractor cost pressures.
- Environmental Contribution Levy (ECL) will increase effective 1 July 2024. However, as the 2024-25 rate will not be confirmed until the Victorian State Budget is released on the 7 May 2024, the 2025FY budget includes the current 2023-24 rate of 5 per cent of 2018-19 revenue.
- CPI increases for future years has been assumed at 3.5 per cent each year (as per ESC PS23 model).

#### OFFICIAL

# Financial Sensitivity Analysis

The 2024-29 Corporate Plan is forecasting a Net Profit After Tax (NPAT) for 2025FY of \$1.9M. As noted above, this forecast result has been derived using several assumptions. Within these assumptions there are several which could have a material impact on the financial outcome for 2024-25. A sensitivity analysis has been prepared to highlight the impact of the key variables on our forecast result.

Based on the sensitivity analysis, the NPAT result could range from a profit of \$362k to \$3.6M. The following tables provide the details of the key variables attributable to the potential movement in the profit result.

| Variable        | Sensitivity   | Comments   |
|-----------------|---|--|
| Capital Revenue | 50 per cent change in revenue (\$1.54M)<br>- cash component<br>- contributed assets   | Revenue is subject to local and nationwide<br>economic factors, beyond the control of<br>Westernport Water. No sign of imminent<br>loss of revenue.<br>Capital revenue could be negatively<br>affected by impacts on development due to<br>the change in economic conditions.<br>However, development could be positively<br>impacted due to an increased transient<br>population. |
| Water Usage     | A 5 per cent change in consumption will<br>impact revenue by \$271k.<br>*A 10 per cent change in consumption<br>will impact revenue by \$542k.<br>*A 20 per cent change in consumption<br>will impact revenue by \$1.08M.<br>*A 50 per cent change in consumption<br>will impact revenue by \$2.7M. | Customer water consumption is subject to<br>seasonal conditions over peak periods.<br>Water usage consumption could be<br>adversely affected by external economic<br>conditions that may impact the local<br>tourism industry.   |
| Electricity     | A 10 per cent change in usage will impact<br>expenditure by \$80k.  | A wet winter/spring period is a causal<br>factor in increased electricity usage and<br>lower solar rebates. New contracts and<br>uncertain pricing through the upcoming<br>introduction of the SEC and emission<br>reduction targets may impact costs<br>however, operational efficiencies and<br>alternate power purchasing agreements will<br>be sought to mitigate this risk.   |
| Employee Costs  | A 3 per cent decrease in vacancy rate will<br>result in a \$289k increase in employee<br>costs.   | The 2024-25 budget includes a vacancy rate<br>of 3 per cent which is less than current<br>trends, however is in line with PS23<br>assumptions.   |
| Service Charges | A 10 per cent change in service charges<br>received will impact cash revenue by<br>\$2.3M<br>*A 20 per cent change in service charges<br>received will impact revenue by \$4.6M<br>*A 50 per cent change in service charges<br>received will impact revenue by \$11.6M                              | Service charge revenue is fixed however<br>cash flow could be negatively affected by<br>the current economic conditions,<br>particularly the inability of customers to<br>pay. Delays in payment could have a<br>negative impact to cash flow which could<br>also result in increased borrowings and<br>related interest charges.  |

Each risk has been assessed in terms of the consequence on the business should the risk emerge, and the potential likelihood that the risk may emerge. The risk rating score for each risk is considered moderate for the business. The table below shows the risk rating scores. Due to the fixed nature and application of service charges, this is not currently considered a risk in the profit sensitivity assumptions however it is a consideration for cash flow forecasts as noted above.

| Variable  | Sensitivity  | Comments   | Risk                 |
|---|--|--|----------------------|
| Capital Revenue<br>- Cash<br>- Contributed Assets | Moderate (\$100k to \$500k loss)<br>Moderate (\$100k to \$500k loss) | Possible (once every 5 years)<br>Possible (once every 5 years) | Moderate<br>Moderate |
| Water Usage                                       | Moderate (\$100k to \$500k loss)                                     | Possible (once every 5 years)                                  | Moderate             |
| Electricity                                       | Minor (less than \$100k loss)  | Possible (once every 5 years)                                  | Moderate             |
| Employee Costs                                    | Moderate (\$100k to \$500k loss)                                     | Possible (once every 5 years)                                  | Moderate             |

## Profit Sensitivity – Down Side Assumption

If all the downside risks were to occur the forecast NPAT result would decline to \$362k. It is unlikely that all risks would arise simultaneously and at their respective maximum points of impact. In addition, the drivers behind each risk are different, which do not create direct links between each risk, such that if one risk were to arise it would not necessarily imply the other risks would emerge.

The table below provides the details on the forecast result on before and after tax basis.

| Profit & loss<br><b>\$'000</b> | 2024-25<br>budget | Capital<br>revenue | Water<br>usage | Electricity | Employee<br>Costs | Net result |
|--------------------------------|-------------------|--------------------|----------------|-------------|-------------------|------------|
| Total Revenue                  | 32,538            | -                  | -              | -           | -                 | 32,538     |
| Revenue Adjustment             | 50*               | (1,543)            | (271)          | -           | -                 | (1,764)    |
| Total Opex                     | (30,043)          | -                  | -              | -           | -                 | (30,043)   |
| Opex Adjustment                | -                 | -                  | -              | (80)        | (289)             | (369)      |
| NPBT                           | 2,545             | -                  | -              | -           | -                 | 362        |
| Тах                            | 636               | -                  | -              | -           | -                 | -          |
|                                | 1,909             | -                  | -              | -           | -                 | 362        |

\*Revenue from profit on sale of disposal of assets.

# Profit Sensitivity – Up Side Assumption

The same business risks have the potential to generate an upside result for the corporation. As with the downside risk above the business drivers for each risk are different so it would be unlikely the NPAT would increase from \$1.9M to \$3.6M during 2024-25.

The table below provide the detail on how the profit upside may eventuate.

| Profit & loss<br><b>\$'000</b> | 2024-25<br>budget | Capital<br>revenue | Water<br>usage | Electricity | Employee<br>Costs | Net result |
|--------------------------------|-------------------|--------------------|----------------|-------------|-------------------|------------|
| Total Revenue                  | 32,538            | -                  | -              | -           | -                 | 32,538     |
| Revenue Adjustment             | 50*               | 1,543              | 271            | -           | -                 | 1,864      |
| Total Opex                     | (30,043)          | -                  | -              | -           | -                 | (30,043)   |
| Opex Adjustment                | -                 | -                  | -              | 80          | 389               | 369        |
| NPBT                           | 2,545             | -                  | -              | -           | -                 | 4,778      |
| Тах                            | 636               | -                  | -              | -           | -                 | 1,195      |
| NPAT                           | 1,909             | -                  | -              | -           | -                 | 3,584      |

# Customer and Demand Assumptions 2024-25

#### Property Forecast 2024-25

Westernport Water's growth assumptions are primarily based on the 2021 Victoria In Future forecasts. However, historical trends have also been incorporated into our growth assumptions which formed the basis of our PS23 growth predictions. The major assumptions driving the property forecast are:

- Growth in residential properties of 2.24 per cent from 2023-24
- Growth in non-residential connections of 1.17 per cent from 2023-24
- No growth predicted in unconnected vacant residential land.

| Property type    | Property<br>Numbers<br>2023-24<br>Forecast | Pricing<br>Submission<br>Year 1 | Variance<br>from PS23<br>Year 1 | Property<br>Numbers<br>2024-25<br>Planned | Pricing<br>Submission<br>Year 2 | Variance<br>from PS23<br>Year 2 |
|------------------|--|---------------------------------|---------------------------------|---|---------------------------------|---------------------------------|

#### Customer Demand Forecast 2024-25

Water demand is typically difficult to forecast because it varies depending on weather conditions, changing population and water use behaviour. There is an additional level of complexity due to the large peaks in (non-permanent) population in summer and the large number of tourists that visit the region, which are also heavily influenced by weather conditions. Usage has been negatively impacted in recent years by various non controllable factors however, demand is expected to return to the PS23 expected levels in the 2024-25 year.

Westernport Water modelled a range of supply and demand scenarios through the 2022 Urban Water Strategy which informed the PS23 demand assumptions. Average demand for residential and non-residential customers has been forecast using the average annual consumption over the previous three financial years which is in line with PS23 assumptions with adjustments made for growth and the impacts on demand resulting from historical trend.

- Annual residential water connections demand forecast 88 kL
- Annual non-residential water connections demand forecast 651 kL

| Retained Earnings                             | 74,172              | 76,081  | 78,582  | 81,585  | 85,245  | 89,192  |
| Asset Revaluation Reserve                     | 109,289             | 112,568 | 115,945 | 119,423 | 123,006 | 126,696 |
| Capital Repatriation –<br>Efficiency Dividend | (200)               | (400)   | (600)   | (600)   | (600)   | (600)   |
| Contributed Capital                           | 51,323              | 51,323  | 51,323  | 51,323  | 51,323  | 51,323  |
| Total Equity                                  | 234,584             | 239,572 | 245,249 | 251,731 | 258,974 | 266,611 |

Note: Where current assets are less than current liabilities indicating a working capital deficiency this is not the case as current borrowings will be redrawn as they fall due therefore will be moved to non-current liabilities. Unearned income relates to billed revenue already received in advance due to the cyclical nature of the billing process.

#### Table D1 – Fixed Service Charge Revenue PS23 2023-28

| Fixed Service Charge Revenue \$'000                         | 2023-24 | 2024-25 | 2025-26 | 2026-27 | 2027-28 | Total PS23 |
|---|---------|---------|---------|---------|---------|------------|
| CPI%  | 7       | 3.6     | 3.5     | 3.5     | 3.5     |            |
| Total Fixed Service Charge Revenue<br>as per PS23           | 22,123  | 23,267  | 24,461  | 25,661  | 26,927  | 122,439    |
| Total Fixed Service Charge Revenue<br>as per Corporate Plan | 22,019  | 23,201  | 24,461  | 25,661  | 26,927  | 122,269    |
| Variance \$   | (104)   | (66)    | -       | -       | -       | (170)      |

#### Table D2 – Metered Usage Revenue PS23 2023-28

| Metered Usage <b>Revenue \$'000</b>                  | 2023-24 | 2024-25 | 2025-26 | 2026-27 | 2027-28 | Total PS23 |
|--|---------|---------|---------|---------|---------|------------|
| CPI%   | 7       | 3.6     | 3.5     | 3.5     | 3.5     |            |
| Total Metered Usage Revenue as per<br>PS23           | 5,484   | 5,767   | 6,060   | 6,360   | 6,675   | 30,346     |
| Total Metered Usage Revenue as per<br>Corporate Plan | 4,973   | 5,417   | 5,960   | 6,559   | 6,976   | 29,885     |
| Variance \$  | (511)   | (350)   | (100)   | 199     | 301     | (461)      |

#### Table D3 – Average Customer Bill PS23 2023-28

| Average Customer Bill                          | 2023-24  | 2024-25  | 2025-26  | 2026-27  | 2027-28  |
|--|----------|----------|----------|----------|----------|
| CPI%   | 7        | 3.6*     | 3.5      | 3.5      | 3.5      |
| Average Customer Bill per PS23                 | 1,316.63 | 1,362.71 | 1,410.41 | 1,459.77 | 1,510.87 |
| Average Customer Bill as per Corporate<br>Plan | 1,316.63 | 1,362.71 | 1,410.41 | 1,459.77 | 1,510.87 |
| Variance \$                                    | -        | -        | -        | -        | -        |

Note: \*The Tariff Schedule for 2024-25 above has been calculated using a CPI increase of 3.6 per cent as **confirmed by WPW's economic** regulator, the Essential Services Commission on 26 April 2024 through the annual tariff approval process. However, tariffs will require further adjustments for Melbourne Water Bulk Charges and cost of debt as per Schedule 5 of PS23 which is expected to be confirmed in May 2024.

### Table D4 – Development Revenue PS23 2023-28

| Development Revenue \$'000                         | 2023-24 | 2024-25 | 2025-26 | 2026-27 | 2027-28 | Total PS23 |
|--|---------|---------|---------|---------|---------|------------|
| CPI%   | 7       | 3.5     | 3.5     | 3.5     | 3.5     |            |
| Total Development Revenue as per<br>PS23           | 3,033   | 3,087   | 3,145   | 3,060   | 3,114   | 15,439     |
